The shoe complies the requirements of footwear "Type 2 – All fire suppression and rescue interventions where protection against penetration and toe protection are needed, no protection against chemical hazards. Suitable for fire rescue, fire suppression, and property conservation in buildings, enclosed structures, vehicles, vessels, or like properties that are involved in a fire or emergency situation" specified in table 4 of EN 15090:2012 standard Category F2A–HI₃.

(*)Subsystems and safety components which are in conformity with harmonised standards or parts thereof the references of which have been published in the Official Journal of the European Union shall be presumed to be in conformity with the essential requirements set out in Annex II Regulation (EU) 2016/425. In the evaluation of conformity, the users should verify the correspondence between their risk assessment and the one described in the above-mentioned standard.

Conditions for validity: The validity of the test report herein depends upon the surveillance activities envisaged by Regulation 2016/425, to be implemented within 12 months of the date of issue shown below. The standards applied are those in force on the date of issue indicated in the test report herein. All modifications made to the model and the materials and the place of manufacture, subject of this EU test report, must be reported and approved by CIMAC. This EU test report can be reproduced in its entirety; the copy must be faithful, readable (if in small format) and must contain the wording in bold "TRUE COPY OF THE ORIGINAL". This test report must be kept by the manufacturer in order that he may produce it, on request, to the control body or supervision administration.
